Press Release

Mumbai, 28th April 2025

**Vodafone Idea to launch 5G Services in
Chandigarh and Patna**

Vodafone Idea announces the launch of its 5G services in Chandigarh and Patna. Starting April 28, 2025, Vi Customers using 5G devices will have access to 5G services in Chandigarh and Patna.

This expansion follows Vi's successful launch in Mumbai in March, where over 70% of eligible users are experiencing Vi 5G, contributing up to 20% of total network data traffic, and is part of Vi's initial 5G rollout phase. The rollout will soon expand to Delhi and Bangalore in May. Additionally, coinciding with the ongoing T20 League, Vi also enabled 5G services in 11 major cricket stadiums across the country, allowing fans to enjoy high speeds during live matches.

As part of its introductory offer, Vi users can enjoy unlimited 5G data on plans starting from Rs. 299 and experience 5G speeds for various use cases like streaming, gaming, conferencing, fast downloads, and real-time cloud access.

The rollout in these circles will continue aligned with the growth in 5G handset penetration and demand for the service.

For network deployment in Chandigarh and Patna, Vi has partnered with Samsung and implemented energy-efficient infrastructure and vRan technology to enhance network flexibility and performance. The Company has also deployed an AI-based Self-Organizing Network (SON) system to further optimize network performance.

Vi is committed to delivering a future-ready network that is seamless, powerful, and capable of meeting the demands of modern connectivity. By expanding its 5G infrastructure and bringing next-generation connectivity to millions of customers, Vi is set to further transform India's digital landscape, empowering both consumers and businesses with advanced mobile applications and services.

Further information on availability, pricing, and supported devices is available at www.myvi.in/5g-network
