

keeping JCOM Bank always on

Junagadh Commercial Co-operative Bank Ltd. (JCOM Bank) is a leading co-operative bank from Gujarat.

Business Challenge

- JCOM Bank required 24/7 access to their banking application servers
- They needed to ensure that their critical banking data is secure. To enable this, the bank required authentication parameters to be set for the access of this data
- They needed to remotely enable real-time data flow between customers and the banks' servers

Our Solution

- We set up MPLS links at their hubs and head offices to ensure continuous connectivity
- If the dedicated MPLS links suffered downtime, our MPLS IoT APN would function as a back-up to provide continued connectivity
- The bank could also operate mobile ATMs in remote locations using secure 3G and 4G network from ViTM
- We converted their public IPs to private IPs and provided secure tunnelling through our private customised APN. We equipped the bank's remote-working employees with secure Core Banking Solutions (CBS) access through our data-only IoT dongles. This ensured that all data transfer was secure

Business Impact

- Our solutions proved to be cost-effective, easy-to-deploy-wirelessly, and required low-maintenance, which helped JCOM Bank improve their business operations
- The bank now has seamless, secure connectivity for all their real-time banking requirements
