

connecting the campus of India's biggest lender

A leading public-sector bank's management institute in Kolkata provides leadership training to students. It is modelled on the lines of pioneering international business institutes.

Business Challenge

- The institute wanted to provide a world-class WiFi experience for their staff and trainees within their campus, which is spread over 10 acres and houses 7 buildings. They needed a secure and reliable wireless network
- The institute also wanted to provide a consistent and high-quality digital experience across all building floors in the hostel, auditoriums, training rooms, and by the poolside

Our Solution

- We deployed our Managed WiFi solution at the campus, with a single point of contact for bandwidth access. This consisted of over 500 access points and was integrated with redundant 500 Mbps internet links, to offer 99.9% uptime
- The entire solution was integrated with WLAN controllers, network access control, load balancers and delivered with end-to-end support on hardware and software, for a 5-year period
- To enhance security, we provided a 5GB DDoS mitigation service that protects the institute from growing cyber threats
- Additional IP pools were also provided for the institute's web-hosting requirements

Business Impact

- These solutions have delivered a cutting-edge WiFi experience on campus, consistent with the customer's vision of building a world-class institution
- It has established the bank as a major digital enabler
- The Managed WiFi model deployed at the institute now serves as a model that can be replicated not only at other branches and sites, but also by other major Indian banks
