

# multi-cloud landscapes, now within your view

Is your **enterprise connectivity solution** addressing all your business needs?

How do I embrace technology to improve business performance?

Chief Digital Officer

How do I protect my users, data and systems from security breaches?

Chief Executive Officer

How do I utilise WAN to provide increased agility to my business?

Chief Security Officer

How do I make the most of the Cloud, data, and application explosion?

Chief Information Officer

In the digital business ecosystem, manually-operated data networks are not efficient enough

**51%** increase in complexity during network maintenance

**51%** more time-consuming manual processes for network changes

**42%** decrease in network responsiveness

**40%** increase in difficulty and cost of regulatory compliance

**36%** increase in security framework complexities around WAN

Your business needs a **Cloud-ready WAN** that ticks all these boxes

A multi-cloud, multi-access, and multi-transport architecture

End-to-end data security in a hybrid network environment

Best transport network selection for data delivery

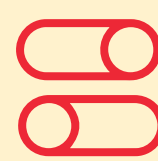

Intelligence to deliver performance based on business policies

Introducing, SD-WAN, a Cloud-ready, multi-tenanted, managed SD-WAN for businesses.

Simplified configuration of multi-site WAN network using online portal

Choice of multi-transport, ILL, MPLS L3, Broadband, 4G LTE

Seamless connectivity to IaaS, SaaS Clouds using secure network

OpEx-based pricing for Managed SD-WAN network

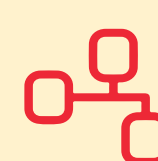

Dynamic application-aware routing on optimal path

Solution consulting, implementation, 24x7 support with SLA

Real-time network, application analytics through customer portal

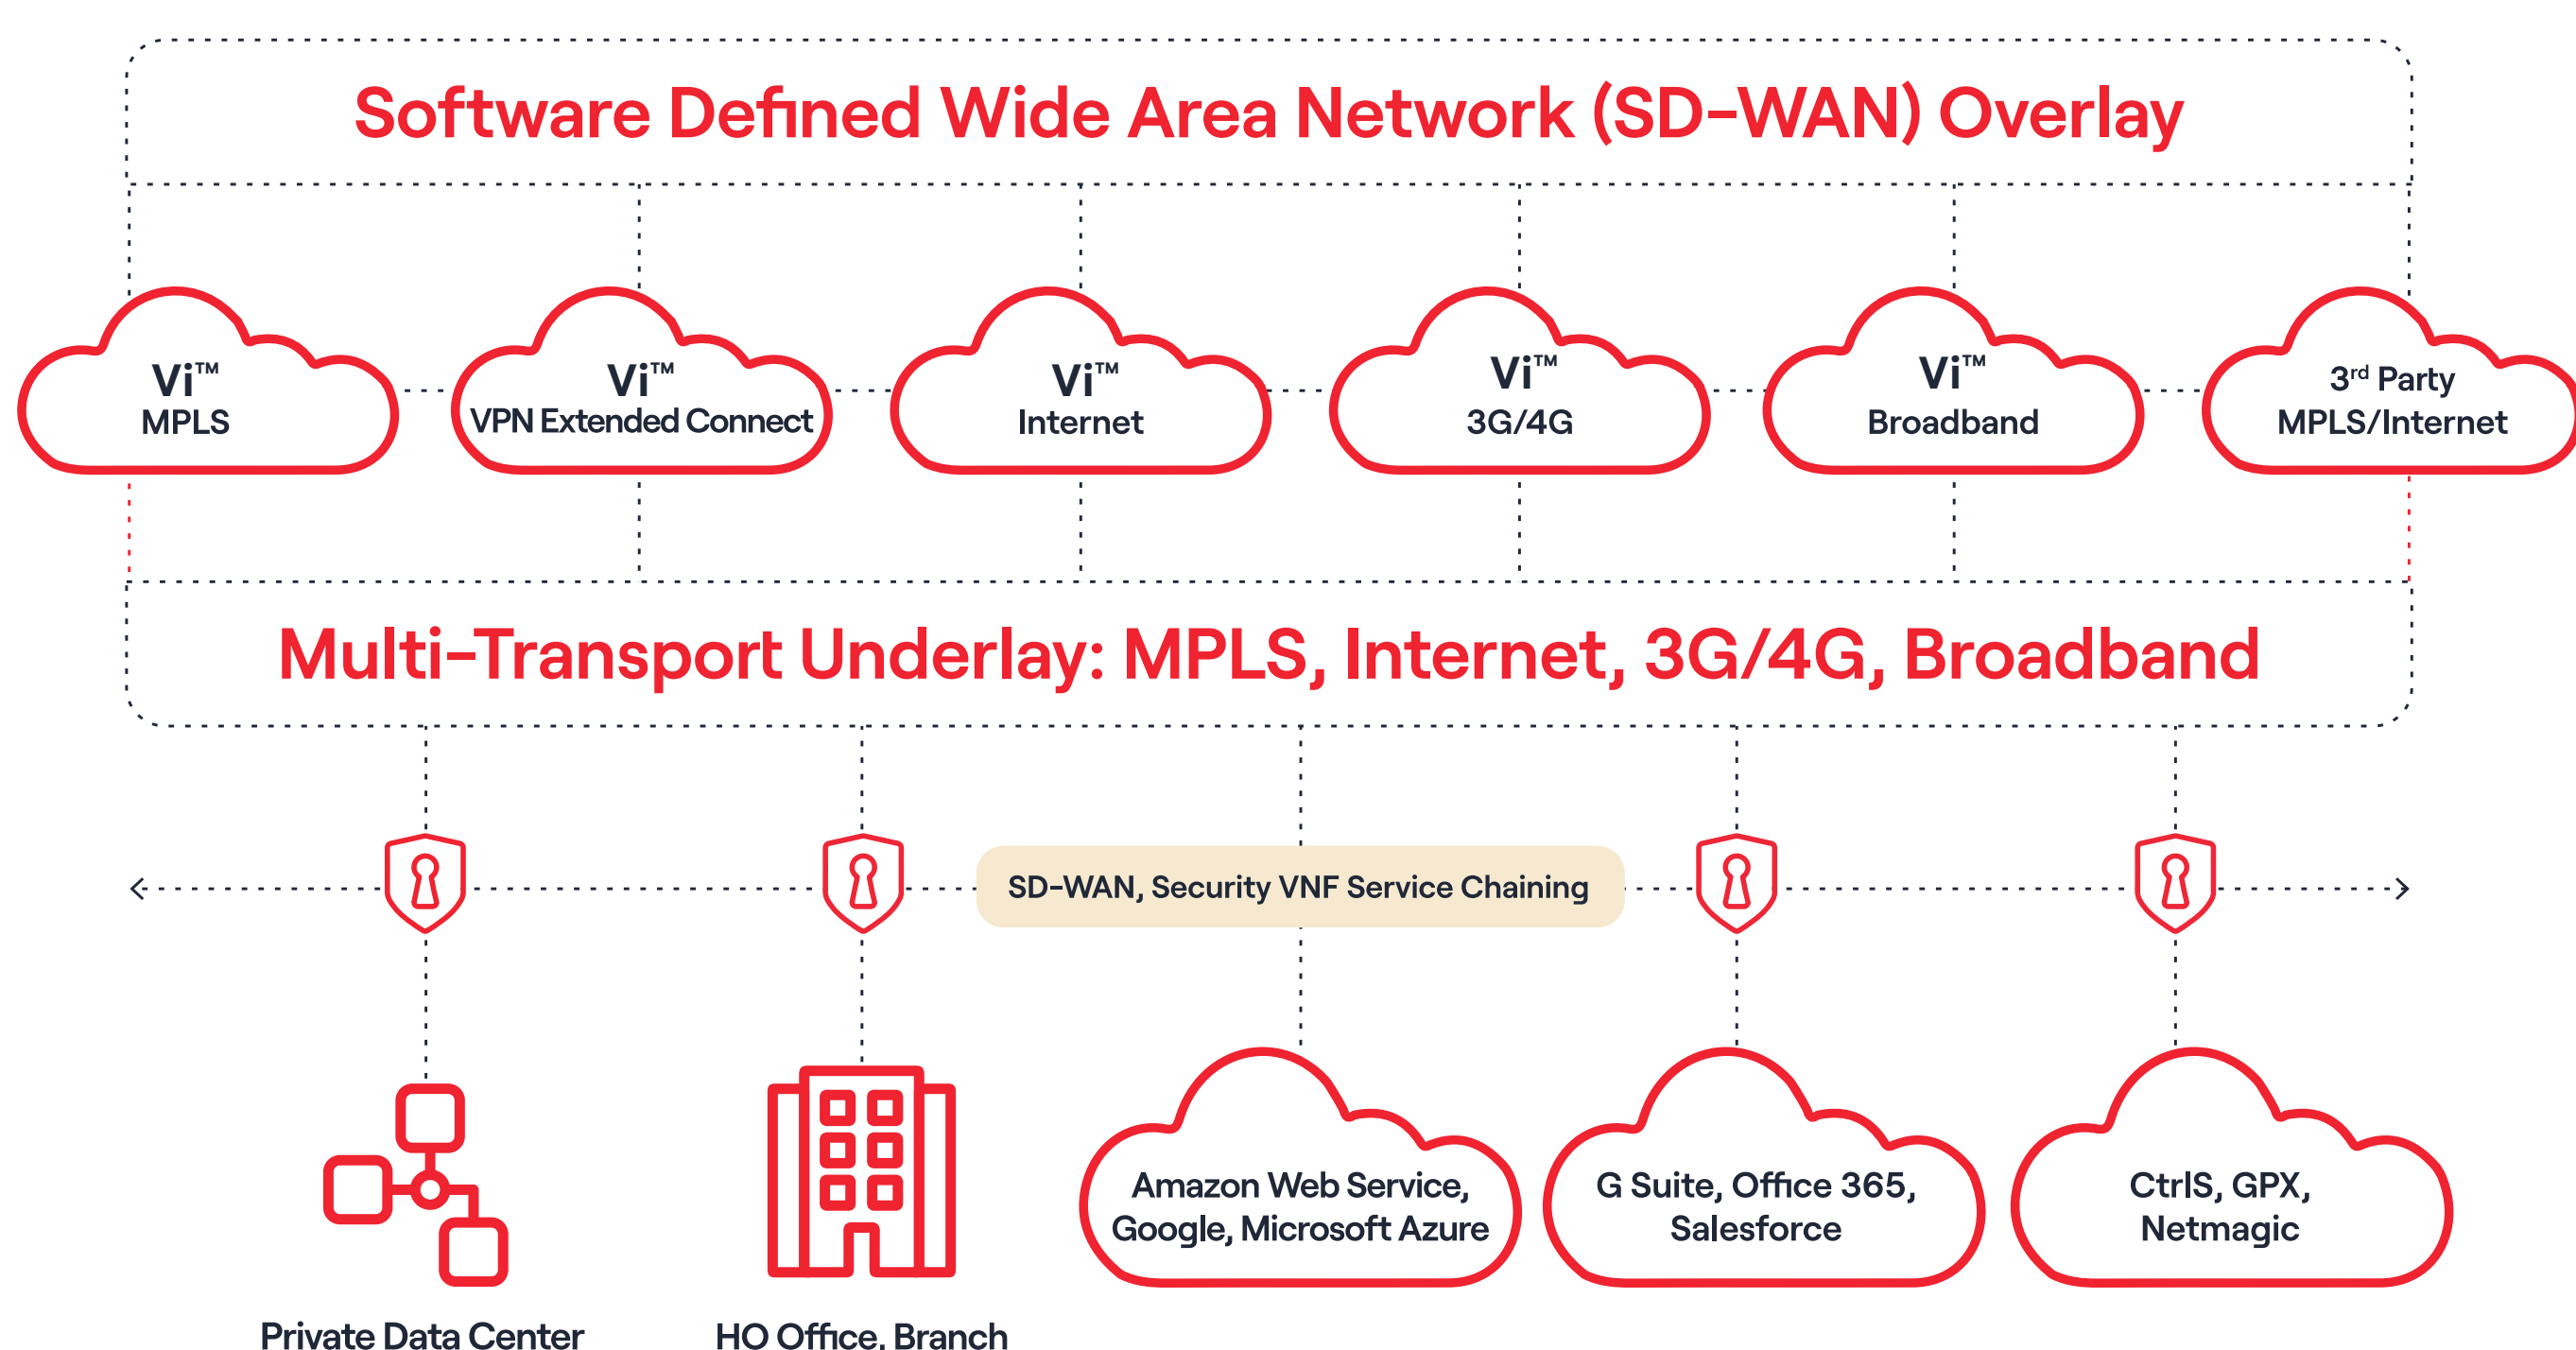

Centralised, automated control of network policies

## How does Vi™ SD-WAN work?

Our unique SD-WAN deployment operates with a centralised control, based on the Software Defined Networking (SDN) framework. Here's what it relies on.

- Our centralised, multi-tenanted SD-WAN platform, powered by Nokia's Nuage Networks
- Easy upgrade to SD-WAN by changing to SD-WAN CPE
- Multitude of transport options to connect head offices, remote offices, data centres, IaaS/SaaS Clouds
- Multi-layer security covering SD-WAN core platform and SD-WAN CPE

**All-inclusive SD-WAN solution that supports multi-cloud, multi-VNF and multi-transport environments**
