

**you press the button,
and we'll take care
of the rest**

Introducing Vi™ Integrated IoT,
the smart, hassle-free solution for
your IoT deployment needs.

With many companies already on the path to IoT adoption and implementation, it is changing the way we do business by reinventing business processes and automating operations at every stage of the product lifecycle, opening up limitless possibilities.

and with these possibilities come their own challenges

Fragmented & complex ecosystem

Security & privacy issues

Lack of end-to-end ownership

Proving business impact

High cost of implementation

Lack of robust connectivity

no two IoT implementations are the same

We understand that each IoT implementation comes with its unique set of complexities. With different suppliers providing various components, like devices, applications, connectivity, analytics, and, integration, it gets incredibly complex to manage everything together.

how Vi™ Integrated IoT makes it simpler

Our solutions are a comprehensive range of IoT products, solutions and managed services, built to deliver value across the industry ecosystem. It's as simple as pressing a button and reaping the benefits of our holistic approach. Your business benefits with,

reduced operational costs and complexity

opportunities to create new revenue streams

superior customer experiences, delivered consistently

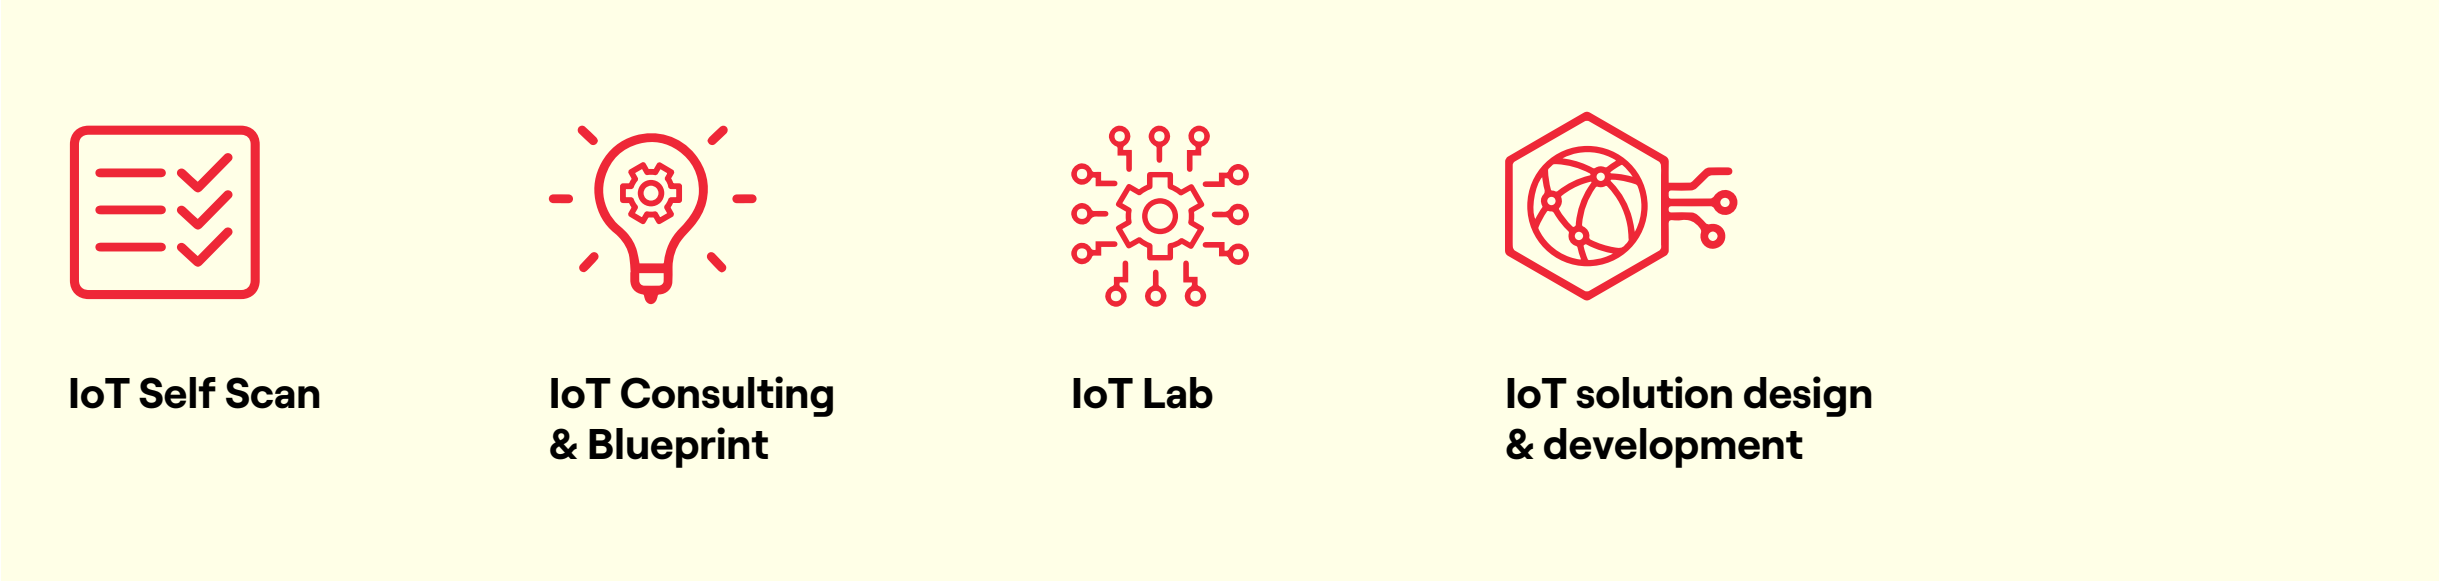

rapid business value being delivered, with proven IoT use cases

Every element of your IoT implementation works seamlessly, with our end-to-end IoT deployment capabilities and efficient service and support.

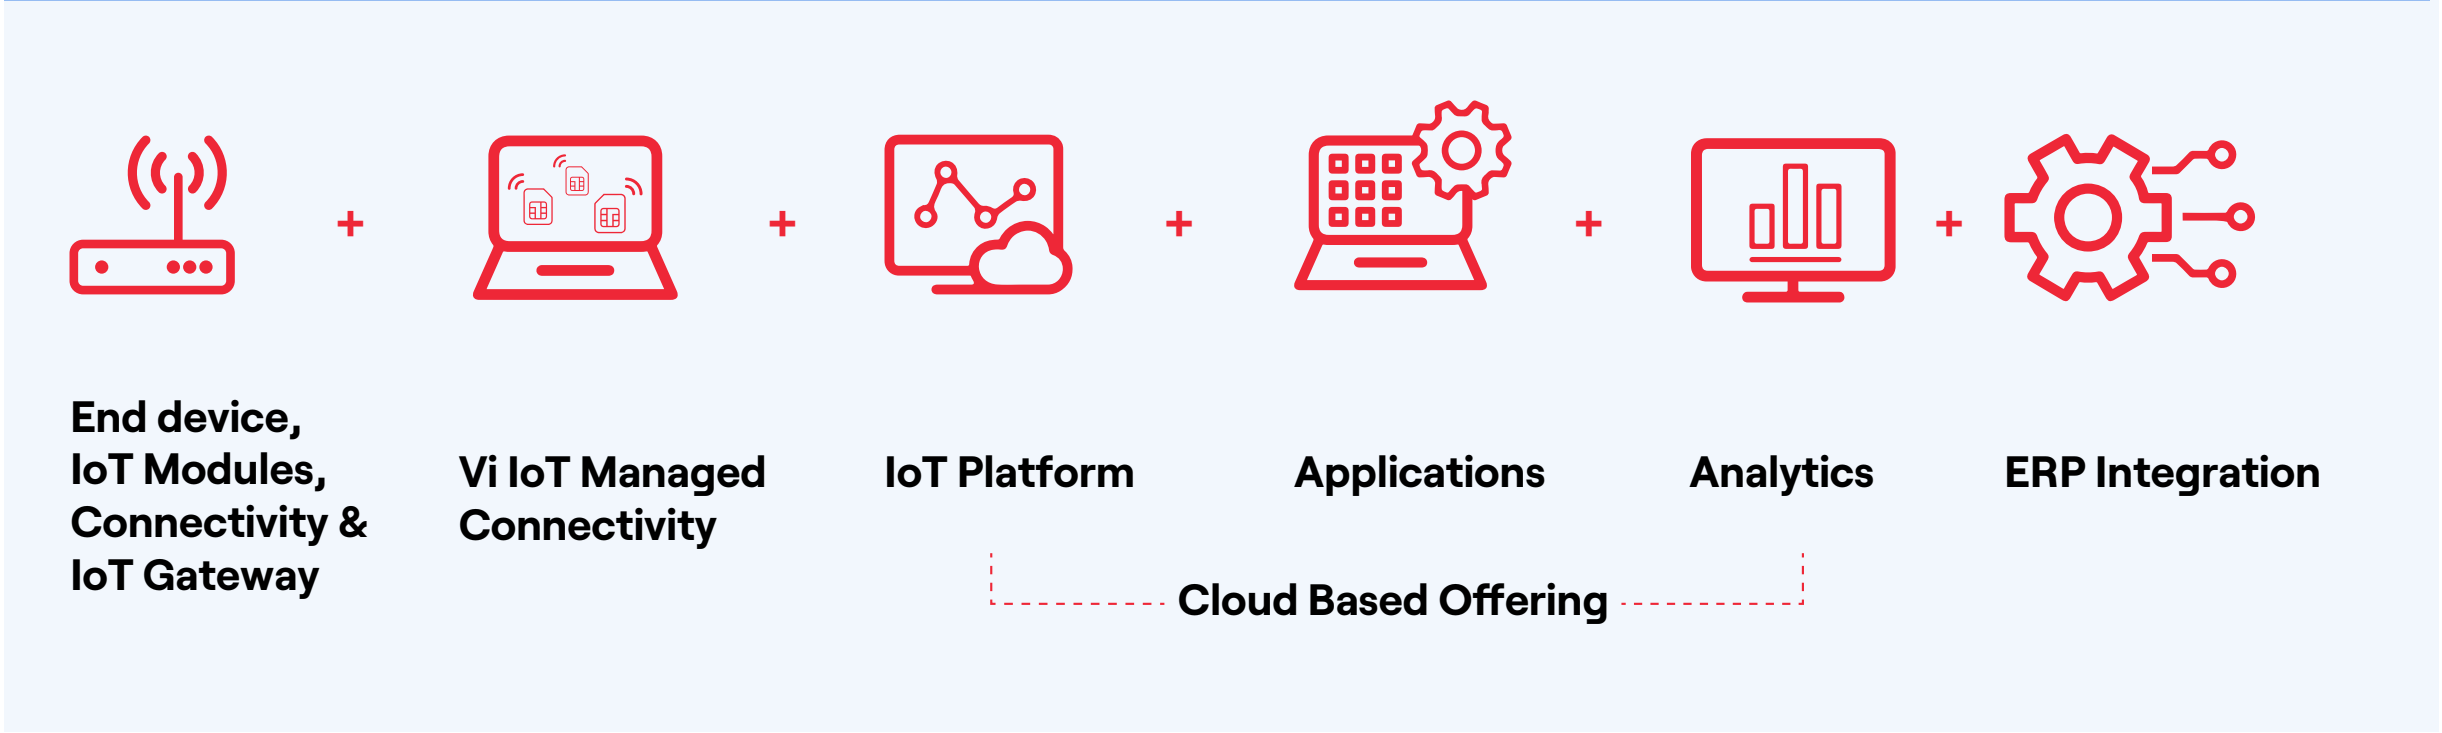

Our team of experts, with specialists from different industry sectors and verticals, coupled with our user-friendly IoT connectivity solutions, resilient IoT SIMs, and an integrated approach, ensure rapid application development and scalability.

how Vi™ Integrated IoT works

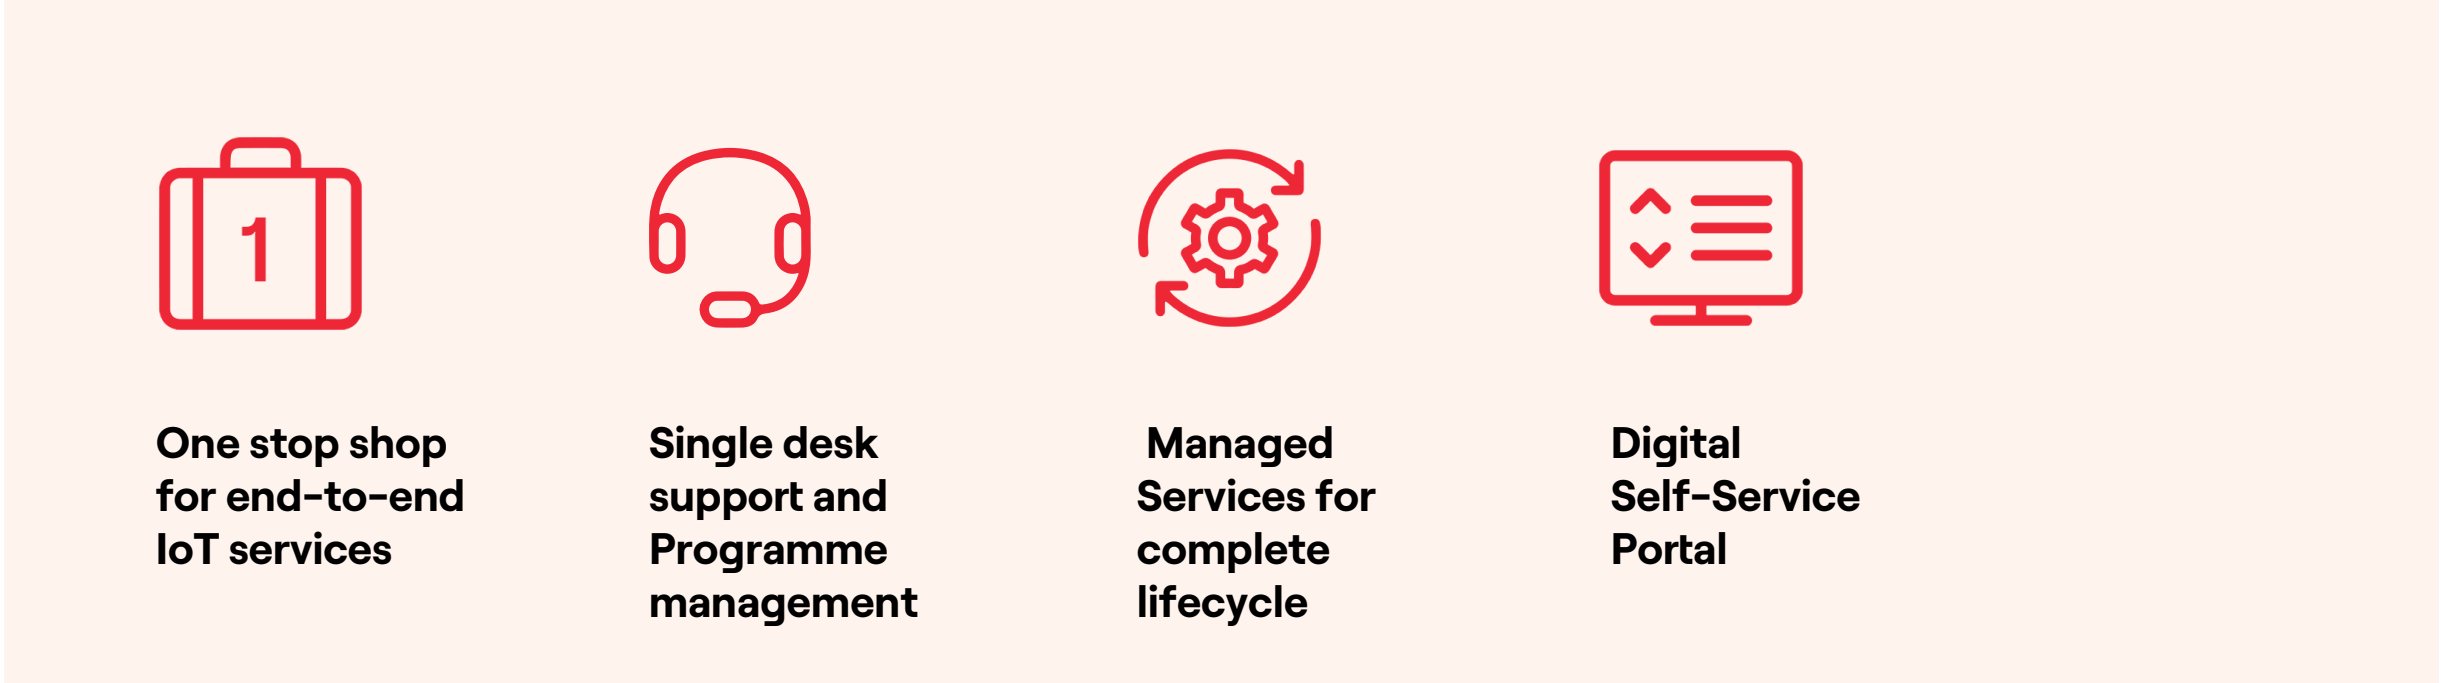

consulting includes concept design and architecture

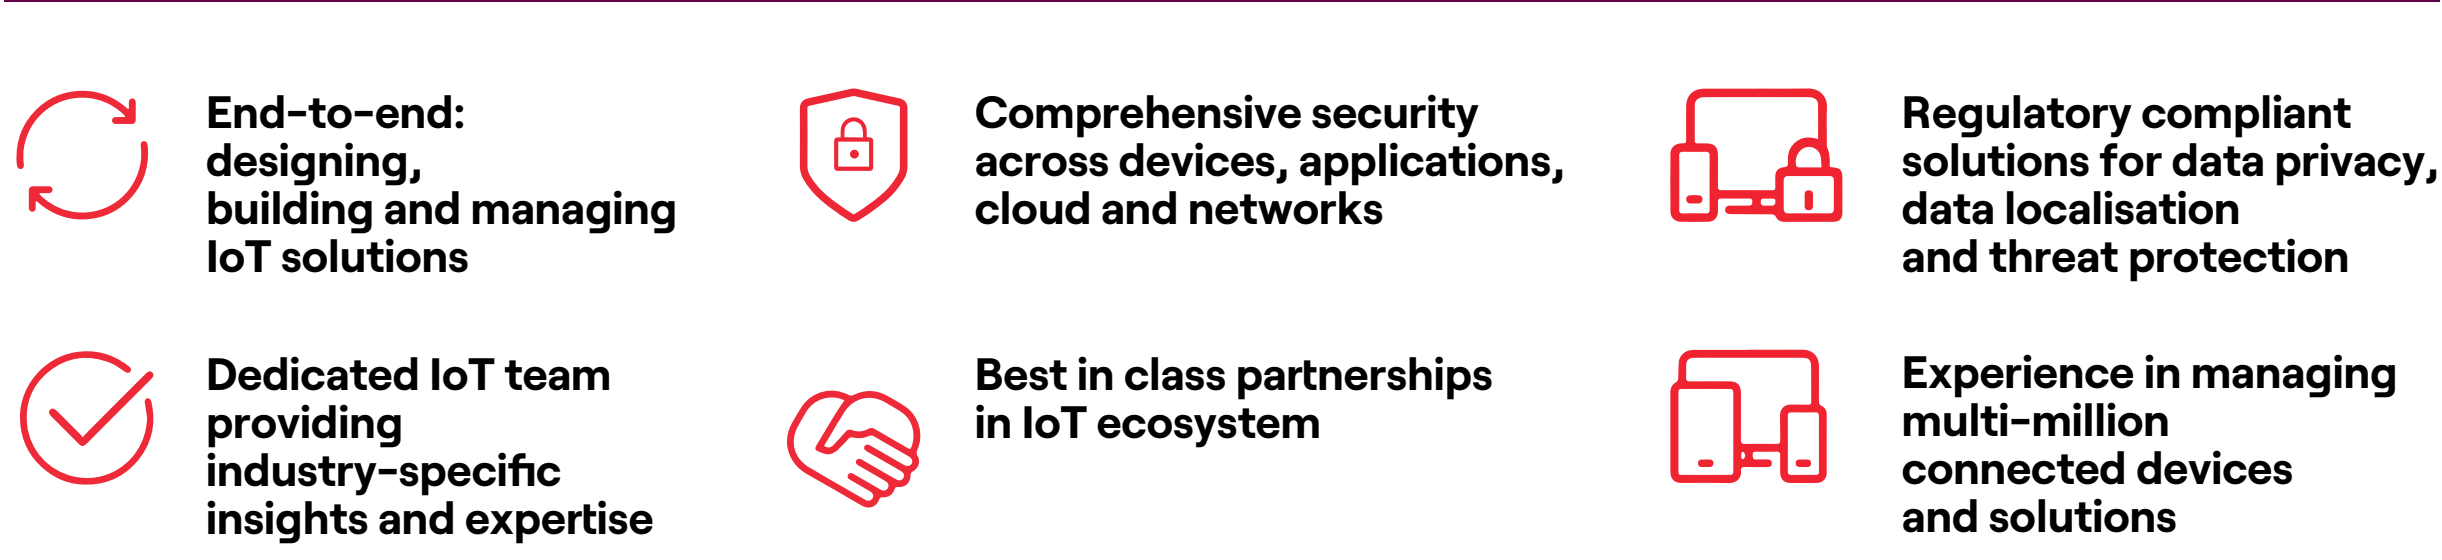

implementation includes solution components and rapid deployment

service & support includes onboarding and service support

our approach to IoT

our range of end-to-end IoT solutions

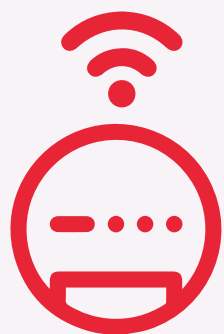

Smart Infrastructure

Intelligently connect your workplace or factory machines, assets and people to deliver seamless operations. [Know more](#)

Smart Mobility

Empowers Automotive OEMs and businesses to create an intelligent mobility ecosystem that is future-fit. [Know more](#)

Smart Utilities

Monitor, manage and control your remote utility assets like water, energy and power through smart IoT solutions and network which brings about cost efficiency, reduces leakage and offers greater visibility over your assets. [Know more](#)

how your business benefits

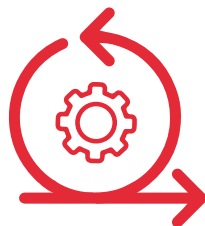

Accelerated Time To Value/ Go To Market

Lower Total Cost of Ownership (TCO)

Reduced complexity through 'as a service' model

Easy integration with existing systems

Improved customer experience and operational efficiency

To know more how we can help you deliver better accountability, faster implementation, and quicker return on investments on your IoT deployments, call at **1800 123 123 123** or [click here](#)
