

**you press the button,
and we'll take care of the rest**

Indian IoT market is expected to grow multi-fold to billions of connected devices.

Top 3 verticals of adoption

Manufacturing

Auto & Transportation

Energy & Utilities

Source: Nasscom-Deloitte IoT The Internet of Things: Revolution in the making, Zinnov report India- Emerging hotbed of IoT Opportunities, Internal estimates

biggest challenges that they face

- Fragmented & complex ecosystem
- Lack of end-to-end ownership
- High cost of implementation
- Security & privacy issues
- Proving business impact
- Lack of robust connectivity

what's the solution?

Organisations today need a **trusted partner** with the domain understanding and IoT expertise **to build a comprehensive approach to IoT deployments that ensures rapid application development, scalability, flexibility and higher ROI**

introducing Vi™ Integrated IoT

The smart, hassle-free solution for your IoT deployment needs

We offer a comprehensive range of IoT products, solutions and managed services, built to deliver value across the industry ecosystem by

Reduced operational costs and complexity

Opportunities to create new revenue streams

Superior customer experiences, delivered consistently

Rapid business value being delivered, with proven IoT use cases

it's as simple as pressing a button.

Every element of your IoT implementation works seamlessly, with our end-to-end IoT deployment capabilities and efficient service and support.

how we make it work

An overview of our integrated approach to IoT deployments

consulting includes concept design and architecture

IoT Self Scan

IoT Consulting & Blueprint

IoT Lab

IoT solution design & development

implementation includes solution components and rapid deployment

End device, IoT Modules, Connectivity & IoT Gateway
