

# where everything is monitored

Drive enhanced visibility and  
control using data-centric insights  
from your connected vehicles

Our **Smart Mobility solutions** empower Automotive OEMs and enterprises to create an intelligent mobility ecosystem that is future-fit.

range of Smart Mobility Solutions

**Connected Vehicle solution**

This is a GPS-based real-time vehicle monitoring and diagnostics solution that transforms any vehicle into a connected vehicle. This solution enables Automotive OEMs and enterprises alike to build a digital experience platform that manages vehicle and passenger safety.

**Fleet Management solution**

This solution uses the power of IoT, analytics and telematics to solve fleet management challenges for enterprises. This IoT-enabled solution also helps businesses improve visibility of their fleet operations, as well as asset and crew utilisation. Thus, increasing operational efficiency, reducing cost and improving customer experience across the industry value chain.

benefits for business

- 

**Power of Data Monetisation:** Make better insight-driven decisions by analysing data generated by the connected vehicle
- 

**Driving Behaviour Analysis for Fleets:** Get insights into driving behaviour through a driving score that takes into account harsh braking, harsh acceleration, and sudden turn events
- 

**Accessibility to Vehicle Data:** As an automotive OEM, you can create value-added service programs for your customers, thereby increasing after-sales service loyalty

## benefits for business

**Improve Productivity and Visibility:** Get the most out of your fleet and prevent delays with visibility on unplanned halts and vehicle idling time

**Seamless Enterprise Integration:** This comes with plug-in adapters and APIs for enterprise or mobile application integration
