Vi launches 5G services in Agra

Leading telecom operator Vi today announced the launch of its 5G services in Agra starting tomorrow. This expansion is part of Vi's ongoing 5G rollout across many cities, in its 17 priority circles where it has acquired 5G spectrum.

Earlier, Vi introduced 5G services in Mumbai, Delhi-NCR, Bangalore, Mysuru, Nagpur, Chandigarh, Jaipur, Sonapat, Patna, Ahmedabad, Rajkot, Surat, Vadodara, Chhatrapati Sambhajnagar, Nashik, Kozhikode, Malappuram, Meerut, Madurai and Vishakhapatnam as part of its phased 5G expansion. Agra becomes the second city in Uttar Pradesh to experience Vi's next gen connectivity, after launching in Meerut a few days earlier.

Vi users in Agra with 5G-enabled devices can access Vi 5G services starting tomorrow. As an introductory offer, Vi is providing unlimited 5G data to users on plans starting from ₹299. Customers can enjoy high-definition streaming, gaming, video conferencing, faster downloads, and real-time cloud access.

Commenting on the launch, **Sumit Agarwal, Circle Business Head – UP & Uttarakhand, Vodafone Idea**, said: "As we launch Vi 5G in Agra, we are excited to bring the future of connectivity to this historic and culturally rich city. With our next-gen 5G alongside our robust 4G services, we aim to provide more options and an enhanced experience to our users. We are committed to systematically expanding our 5G footprint across Uttar Pradesh, in line with growing demand and 5G handset adoption."

To ensure a superior 5G experience in Uttar Pradesh, Vi has partnered with Nokia to deploy advanced, energy-efficient infrastructure and implemented AI-powered Self-Organizing Networks (SON) to automatically optimize network performance.

In parallel with its 5G roll out, Vi has also significantly upgraded its 4G network in Uttar Pradesh to deliver enhanced coverage, faster data speeds, and overall superior user experience. Since March 2024, it has successfully deployed 900 MHz spectrum on more than 14000 sites to strengthen indoor coverage, as well as deployed 2100 MHz spectrum across more than 9000 sites. Additionally, Vi has bolstered its 2500 MHz capacity across more than 820 sites, enhancing both reach and data traffic handling capabilities. These upgrades implemented over 15 months from April 2024 to June 2025 have led to a 43 percent capacity increase in Uttar Pradesh and underscore Vi's commitment to delivering consistent and high-quality connectivity across urban and rural areas.

Vi remains committed to building a future-ready network that meets the evolving digital needs of consumers and businesses. For more details on availability, pricing, and supported devices, visit: <https://www.myvi.in/5g-network>
