

# where everything is monitored

Drive enhanced visibility and  
control using data-centric insights  
from your connected vehicles

Our **Smart Mobility solutions** empowers automotive OEMs, fleet owners and enterprise to create an intelligent mobility ecosystem that is future-fit.

range of Smart Mobility Solutions	
	<div><b>Connected Vehicle solution</b></div> <p>This is a GPS-based real-time vehicle monitoring and diagnostics solution that transforms any vehicle into a connected vehicle. This solution enables Automotive OEMs and enterprises alike to build a digital experience platform that manages vehicle and passenger safety.</p>

# range of Smart Mobility Solutions

## Cold Chain Monitoring

Cold chain monitoring solution is a temperature-controlled supply chain that helps you track your assets’ condition with vehicle tracking benefits. By controlling the cabin temperature, it reduces the scope of spoilage and ensures loss prevention.

## Asset tracking

Our Asset Tracking solution provides end-to-end visibility & tracking of assets at a container level and consignment level. It ensures overall efficiency and security of assets, with alerts on security breaches. You can now locate and identify your lost asset easily with this solution.

## Electric Vehicles

Our electric vehicle offering empowers you to monitor your EV fleet movement, vehicle and battery health. This solution enables speed monitoring, analyses driving behavior & gives instant alerts on tampering. It helps reinvent your EV with remote vehicle immobilisation, wheel lock, and keyless ignition features.

## People Tracking

Our people tracking solution provides real-time visibility of work force and ensures their safety and security. Other than GPS location tracking, this solution has the capability to generate SOS alerts and initiate a two-way communication with an emergency response system as well.

## benefits for business

**Power of Data Monetisation:** Make better insight-driven decisions by analysing data generated by the connected vehicle

**Driving Behaviour Analysis for Fleets:** Get insights into driving behaviour through a driving score that takes into account harsh braking, harsh acceleration, and sudden turn events

**Accessibility to Vehicle Data:** As an automotive OEM, you can create value-added service programs for your customers, thereby increasing after-sales service loyalty

**Improve Productivity and Visibility:** Get the most out of your fleet and prevent delays with visibility on unplanned halts and vehicle idling time

**Seamless Enterprise Integration:** This comes with plug-in adapters and APIs for enterprise or mobile application integration

**Improved safety and security:** Increase vehicle and people's safety by analyzing driver's driving, setting safety modes, trigger alerts in case of tampering, theft or security breaches and provide emergency assistance.
