

# streamlining supply chain & vendor interactions

...is easy for India's leading  
automotive with our device-bundled  
**Vi Business Managed Mobility solution**

## Streamlining Supply Chain Vendor Interactions with **Vi Business Managed Mobility Solution**

India's leading automotive company boasts a diverse portfolio of 17 car models with over 150 variants, ranging from entry-level small cars to premium SUVs. The company employs over 40,000 people and has the largest sales and service network among car manufacturers in India.

## Business Challenge

---

- They wanted to ensure data security and supplier compliance across departments
- They were looking to manage interactions with over 1,542 vendors that were providing raw materials, components, and consumables
- Maintaining control over productivity and confidentiality, was also a concern

## Our Solution

---

- We offered our Managed Mobility Solutions, including devices, connectivity, service support, and business continuity solutions delivered directly to employees' office locations.
- A dedicated Managed Mobility desk and a service manager were assigned to their company, to track each service request, arrange door-to-door pick-up and drop-off, and ensure timely closure of tickets.

## Business Impact

---

- With Vi Business Managed Mobility solutions, the automotive company successfully implemented its leadership's compliance requirements.
- The solution is currently deployed to over 450 employees across all levels in the Supply Chain Management (SCM) department.
