more scalability, availability, and security for your IT infrastructure

Vi® Infrastructure Colocation

introduction

With businesses, like yours, increasingly relying on data to improve performance and build better offerings, they need to be well-equipped to efficiently handle and manage large volumes of data, so that it's easily accessible. However, managing an in-house data center while safeguarding against security threats can be difficult.

With Vi Infrastructure Colocation, your business gets access to world-class data centers, built as per the highest global specifications, to house your IT & Network infrastructure. This solution takes care of all aspects of your IT infrastructure by offering an optimal, secure, and well-connected facility while providing rack space, power, cooling, network connectivity, cross-connects, physical security for the servers, storage, and networking equipment - at a fraction of cost and complexity. Ideal for organisations with high investments in IT and data centre equipment.

why choose Vi Infrastructure Colocation?

- Access to data centers across Mumbai, Bengaluru, Noida and Hyderabad with a range of services like rack space, caged colocation along with power

- Tier-IV/Rated-4 facilities operating at the industry lowest PUE

- Redundantly connected carrier neutral facilities, zero last miles and higher availability

- Option to select from Tier-IV/Rated-4 data centres with innovative and power-efficient cooling backed by power systems, network facilities and physical security measures

- Multi-zone security, in line with global standards, provides unparalleled security measures

- Additional services such as managed hosting service, caged colocation, biometric access and much more

what gives it an edge?

Rack/Server Space - Standard Racks, IT Hardware, Power and more

Accessibility - Network connectivity, cross connects and more

Managed Services - Remote hand support, 24/7 support, OS & DB management services, network management and monitoring services amongst others

Security & CCTV – Multi-zone security layer, CCTV monitoring, caged space, biometric access controls, and more

Compliance and certifications - ISO 27001, ISO 27017, ISO 27018, ISO 20000, ISO 22301, ISO 9001: 2015, AICPA SOC, AICPA SOC 2, MEITY, PCI DSS, CSA

how does it benefit your business?

- Tier-IV/Rated-4 Facilities leads to more redundancy and higher uptime

- Industry lowest PUE results in reduced operational expenditure

- Data centers are available across 4 cities i.e Mumbai, Noida, Hyderabad, and Bangalore. Additional facilities are planned in Pune, Ahmedabad (GIFT City), Chennai, Kolkata, and Lucknow

- Superior service backed by enterprise grade SLA's

- Managed services available with end-to-end life cycle management of the IT infrastructure
