

**transformative
mobility solutions
to enhance
business productivity**

In today's fast-paced digital world, employees demand not just remote access and real-time collaboration, but also the freedom to work flexibly. Embracing change and implementing the correct mobility strategy empowers you to offer users choice and control to work more productively and efficiently.

Vi Enterprise Managed Mobility provides your business with a comprehensive approach to securing and enabling your employees to use smartphones and tablets.

Our advanced mobility solutions ensure the implementation of a robust mobility strategy within your organisation, incorporating the right policies, processes, and support systems to fortify security and embrace dynamic changes seamlessly. And through our specialised managed services, we excel in outsourcing and supporting the management of your mobility infrastructure, allowing you to redirect valuable IT resources and assets toward new strategic areas.

Our comprehensive approach involves tailoring an optimal device mix to suit your diverse workforce needs, coupled with effective device and application management solutions.

Key features:

Hardware Procurement

Select from a wide range of device options from leading OEMs to suit your business needs

Staging and Kitting
